Anabatic's motto in delivering high value solutions and services to increase customer competitive advantages.

“The right people in the right time and the right position would be the key of our company’s improvement; we developed our company through our corporate culture and values.”

Anabatic Technologies has aimed to deliver solutions required by companies to compete in today's digital economy; the necessity to revisit their business processes has never been higher. In the interface of the global challenges, Anabatic is at hand to assist you through the changes.

Still in its early years, Anabatic has grown to be one of the foremost IT companies in Indonesia, supported by our international alliances and trusted by companies. The understanding about local business practices and culture give result in successful implementation on companies both in Private and in Public sectors and provide them with on time and within budget integrated solutions. The confidence from our partners, including IBM, Temenos, SAP, Microsoft, and WKFS had advanced Anabatic to become the preferred IT solutions provides for major companies in Indonesia.

This great achievement is also made possible by the development of our employees through Anabatic Learning Centre (ALC). The right people in the right time and the right position would be the key of our company’s improvement; we developed our company through our corporate culture and values. Therefore, we have set a high benchmark in our recruitment and sustained our employees’ skill and knowledge through continuous learning.

When it is time to re-examine and lead through the transformation of your business process, we are ready to present you with a solution that is reliable, cost-effective and trustworthy.

ABOUT ANABATIC

Founded in 2002, Anabatic Technologies has provided an integrated IT solution for Major Companies in Indonesia. We have served varieties of businesses ranging from Banking to Telecommunication, Pharmaceutical to Government and delivered our results on time on budget during implementation.

From a company consisted of 20 dedicated people, Anabatic has grown to be one of the foremost IT Company in Indonesia with over 600 employees. Our team consists of functional and technical consultants as well as subject matter experts. Therefore, we have set a high benchmark in our recruitment and continuously develop our people' skills and knowledge through continuous learning.

Anabatic combines leading edge technology with the best of breed solutions to offer its clients solutions for the internet age of today. Since its formation, Anabatic aims to deliver high value and the best suitable products and services which increase customer competitive advantages.

With technological advancements and the ever-changing business environments, companies strive to keep ahead by using the most efficient and effective tools to sharpen their business edges.
