

Course Code	TKU311																					
Course Name	Industrial Management																					
Course Instructors	Subagyo																					
Course Type	Required																					
Course Classification	General Education																					
Credit / Contact Hour per Week	2 / 150 minutes per Week																					
Course Description	This course gives an overview about managerial concept in the industry. Besides the understanding of the managerial concept, students have to be able to think as a manager using risk and consequences analysis.																					
Prerequisites Courses	Mathematics for Engineers, Probability and Statistics																					
Covered Student Outcome	Knowledge of Contemporary Issues (j) Development of Engineering Solution (e) Engineering Awareness and Society (h)																					
Learning Outcome																						
<table border="1"> <thead> <tr> <th colspan="2"></th> <th>Study Program Student Outcome</th> </tr> </thead> <tbody> <tr> <td>No</td> <td>Learning Outcome</td> <td>SO (a) – SO (k)</td> </tr> <tr> <td>1.</td> <td>Students are able to <u>explain</u> the basic concepts of managerial in the industry.</td> <td>Knowledge of Contemporary Issues (f)</td> </tr> <tr> <td>2.</td> <td>Students are able to <u>design</u> and optimize the minimum risks as well as the maximum profit if the constrain is given.</td> <td>Development of Engineering Solution (e)</td> </tr> <tr> <td>3.</td> <td>Students are able to formulate commercial vision and mission systematically.</td> <td>Development of Engineering Solution (e)</td> </tr> <tr> <td>4.</td> <td>Students are able to understand the concept of economic forecasting.</td> <td>Engineering Awareness and Society (h)</td> </tr> <tr> <td>5</td> <td>Students are able to use basic concept from mathematics and statistics to draw conclusion related to economic problems.</td> <td>Engineering Awareness and Society (h)</td> </tr> </tbody> </table>				Study Program Student Outcome	No	Learning Outcome	SO (a) – SO (k)	1.	Students are able to <u>explain</u> the basic concepts of managerial in the industry.	Knowledge of Contemporary Issues (f)	2.	Students are able to <u>design</u> and optimize the minimum risks as well as the maximum profit if the constrain is given.	Development of Engineering Solution (e)	3.	Students are able to formulate commercial vision and mission systematically.	Development of Engineering Solution (e)	4.	Students are able to understand the concept of economic forecasting.	Engineering Awareness and Society (h)	5	Students are able to use basic concept from mathematics and statistics to draw conclusion related to economic problems.	Engineering Awareness and Society (h)
		Study Program Student Outcome																				
No	Learning Outcome	SO (a) – SO (k)																				
1.	Students are able to <u>explain</u> the basic concepts of managerial in the industry.	Knowledge of Contemporary Issues (f)																				
2.	Students are able to <u>design</u> and optimize the minimum risks as well as the maximum profit if the constrain is given.	Development of Engineering Solution (e)																				
3.	Students are able to formulate commercial vision and mission systematically.	Development of Engineering Solution (e)																				
4.	Students are able to understand the concept of economic forecasting.	Engineering Awareness and Society (h)																				
5	Students are able to use basic concept from mathematics and statistics to draw conclusion related to economic problems.	Engineering Awareness and Society (h)																				
Topic	<ol style="list-style-type: none"> 1. Introduction to managerial concept 2. Introduction to risks management 3. Introduction to economic forecasting 																					
Direct Assesment	<table border="1"> <thead> <tr> <th>Direct Assesment Plan</th> <th>Measured Learning Outcome</th> </tr> </thead> <tbody> <tr> <td>Individual Project</td> <td>LO1, LO2, LO3, LO4</td> </tr> <tr> <td>Team Project</td> <td>LO2, LO3</td> </tr> <tr> <td>Final Team Project</td> <td>LO1, LO2, LO5</td> </tr> <tr> <td>50% Class attendance</td> <td>LO1, LO2</td> </tr> <tr> <td></td> <td></td> </tr> </tbody> </table>	Direct Assesment Plan	Measured Learning Outcome	Individual Project	LO1, LO2, LO3, LO4	Team Project	LO2, LO3	Final Team Project	LO1, LO2, LO5	50% Class attendance	LO1, LO2											
Direct Assesment Plan	Measured Learning Outcome																					
Individual Project	LO1, LO2, LO3, LO4																					
Team Project	LO2, LO3																					
Final Team Project	LO1, LO2, LO5																					
50% Class attendance	LO1, LO2																					
Indirect Assesment	Questionnaire (EDOM)
