

## Universitas Gadjah Mada

Fakultas Teknik

Departemen Teknik Elektro dan Teknologi Informasi

Program Sarjana Program Studi Teknik Elektro

### TKEE262513

Kecerdasan Artifisial

#### INFORMASI MATA KULIAH

|                   |                          |
|-------------------|--------------------------|
| SKS               | 2                        |
| Semester          | 5                        |
| Status MK         | Wajib                    |
| Klasifikasi MK    | Topik Engineering        |
| Kode MK Prasyarat | TKEE262203<br>TKEE262418 |

#### CPL DAN CPMK

| CPMK   |                                                                                                                                    | CPL                                                   | Metode Asesmen   |
|--------|------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------|------------------|
| CPMK 1 | Mahasiswa mampu memahami Kecerdasan Buatan, khususnya kecerdasan buatan berbasis aturan ( <i>rule-based AI</i> ) dan probabilitas. | CPL 1<br><i>Fundamental and Engineering Knowledge</i> | Tugas UTS        |
| CPMK 2 | Mahasiswa mampu memahami pembelajaran mesin ( <i>machine learning</i> ).                                                           | CPL 1<br><i>Fundamental and Engineering Knowledge</i> | Tugas UTS        |
| CPMK 3 | Mahasiswa mampu memahami kecerdasan buatan modern, seperti Deep Learning dan Reinforcement Learning.                               | CPL 1<br><i>Fundamental and Engineering Knowledge</i> | Tugas UAS        |
| CPMK 4 | Mahasiswa mampu mengimplementasikan kecerdasan buatan menggunakan bahasa pemrograman.                                              | CPL 5<br><i>Modern Tools Utilization</i>              | Tugas UTS<br>UAS |

#### DESKRIPSI SINGKAT MATA KULIAH

Mahasiswa mampu memahami Kecerdasan Artifisial (*Artificial Intelligence*) dan Pembelajaran Mesin (*Machine Learning*) beserta sejarah, taksonomi, dan contoh penerapannya. Mahasiswa juga mampu memahami representasi pengetahuan, sistem pakar, pembelajaran mesin, serta teknik kecerdasan buatan modern seperti deep learning dan/atau reinforcement learning. Selain itu,

mahasiswa mampu mengimplementasikan pemahamannya dengan menggunakan bahasa pemrograman.
